Additional info

Anti-GCDFP-15, mouse monoclonal (23A3), and anti-mammaglobin, mouse monoclonal (304-1A5) and rabbit monoclonal (31A5), is an antibody cocktail. GCDFP-15 is a 15 kDa glycoprotein which is localized in the apocrine metaplastic epithelium lining breast cysts and in apocrine glands in the axilla, vulva, eyelid, and ear canal. Mammaglobin (10 kDa) is a breast-associated glycoprotein distantly related to the secretoglobulin family that includes human uteroglobin and lipophilin. This antibody cocktail is useful in identifying breast carcinoma.
