

Mouse anti-CD71, clone MRQ-48

Clone no. MRQ-48

MONOSAN Ready To Use

Product name	Mouse anti-CD71, clone MRQ-48
Host	Mouse
Applications	IHC-P
Species reactivity	human
Conjugate	-
Immunogen	Unknown or proprietary to MONOSAN and/or its suppliers
Isotype	IgG1
Clonality	Monoclonal
Clone number	MRQ-48
Size	7 ml
Concentration	n/a
Format	-
Storage buffer	Tris Buffer, pH 7.3-7.7, containing 1% BSA and <0.1% Sodium Azide
Storage until expiry date	2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Mouse anti-CD71, clone MRQ-48

Clone no. MRQ-48

MONOSAN Ready To Use

Additional info

CD71, also known as transferrin receptor, is a membrane glycoprotein that mediates the uptake of iron from transferrin for hemoglobin synthesis in erythroid cells. Early erythroid precursors and erythroblasts contain the highest mass of transferrin receptors, and expression is lost as these cells cease hemoglobin synthesis and mature into erythrocytes. Therefore, anti-CD71 is a useful marker for highlighting erythroid precursors in bone marrow specimens. Increased CD71 expression is also associated with active cell growth including neoplastic tumor growth and may be seen in various carcinomas such as thyroid carcinomas, lung carcinomas, breast carcinomas, hepatocellular carcinomas and colorectal carcinomas.
