

Mouse anti-CD16, clone MEM-154 (Monoclonal)

Clone no. MEM-154

MONOSAN

Product name	Mouse anti-CD16, clone MEM-154 (Monoclonal)
Host	Mouse
Applications	FC , IP, WB
Species reactivity	Human
Conjugate	-
Immunogen	Human granulocytes
Isotype	IgG1
Clonality	Monoclonal
Clone number	MEM-154
Size	0.1 mg
Concentration	1 mg/ml
Format	-
Storage buffer	Phosphate buffered saline (PBS) solution with 15 mM sodium azide
Storage until expiry date	2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Mouse anti-CD16, clone MEM-154 (Monoclonal)

Clone no. MEM-154

MONOSAN

Additional info

CD16 (FcγRIII) is a 50-65 kDa glycoprotein serving as a low affinity IgG receptor. Human FcγRIII is expressed in two forms – FcγRIII-A and -B. FcγRIII-A is a transmembrane protein of monocytes, macrophages, NK cells and a subset of T cells. It is associated with FcεRI-gamma subunit and is responsible for antibody-dependent NK cell cytotoxicity. Mast cell FcγRIII-A is associated, moreover, with FcεRI-beta subunit. Besides IgG, FcγRIII-A can be triggered also by oligomeric IgE. FcγRIII-B is a GPI-linked monomeric receptor expressed on neutrophils and is involved in their activation and induction of a proadhesive phenotype.
