

Mouse anti-CD27, clone LT27, Phycoerythrin (Monoclonal)

Clone no. LT27

MONOSAN

Product name	Mouse anti-CD27, clone LT27, Phycoerythrin (Monoclonal)
Host	Mouse
Applications	FC
Species reactivity	Human
Conjugate	PE
Immunogen	Human peripheral blood lymphocytes
Isotype	IgG2a
Clonality	Monoclonal
Clone number	LT27
Size	100 tests
Concentration	n/a
Format	Purified by protein-A affinity chromatography.
Storage buffer	Stabilizing phosphate buffered saline (PBS) solution containing 15 mM sodium azide
Storage until expiry date	2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Mouse anti-CD27, clone LT27, Phycoerythrin (Monoclonal)

Clone no. LT27

MONOSAN

Additional info

CD27 is a transmembrane 55 kDa protein of the nerve growth factor-receptor family, expressed as a disulfide-linked homodimer on mature thymocytes, peripheral blood T cells and a subpopulation of B cells. Activation of T cells via TCR-CD3 complex results in upregulation of CD27 expression on the plasma membrane as well as in the release of its soluble 28-32 kDa form, sCD27, detected in the plasma, urine or spinal fluid. This sCD27 is an important prognostic marker of acute and chronic B cell malignancies. RgpA, a cystein proteinase, although activating T cells through the protease-activated receptors (PARs), degrades CD27 and counteracts T cell activation mediated by CD27 and its ligand CD70.
