### Product datasheet

MON5084

MONOSAN

Mouse anti-IL-1 RII, clone 6G5 (Monoclonal)Clone no.6G5

| Product name              | Mouse anti-IL-1 RII, clone 6G5 (Monoclonal)            |  |
|---------------------------|--|--|
| Host                      | Mouse  |  |
| Applications              | ELISA  |  |
| Species reactivity        | human  |  |
| Conjugate                 | -  |  |
| Immunogen                 | Unknown or proprietery to MONOSAN and/or its suppliers |  |
| lsotype                   | lgG2a  |  |
| Clonality                 | Monoclonal   |  |
| Clone number              | 6G5  |  |
| Size                      | 1 ml   |  |
| Concentration             | 100 ug/ ml   |  |
| Format                    | -  |  |
| Storage buffer            | PBS with 0.1% BSA and 0.02% sodium azide               |  |
| Storage until expiry date | 2-8°C  |  |

### Product datasheet

MON5084

# MONOSAN

Mouse anti-IL-1 RII, clone 6G5 (Monoclonal) Clone no. 6G5

MONOSAN

#### Additional info

The antibody reacts specificly with Human IL-1RII. The IL-1 system includes two agonists (IL-1alpha and IL-1beta), converting enzymes, antagonists, two receptors (IL-1RI and IL-1RII) and the IL-1 receptor accessory protein. The IL-1RII is part of the antagonistic IL-1 mechanism. It is also known as decoy receptor and is a non signaling molecule which functions by capturing IL-1 and preventing it from interacting with the signalling IL-1RI. The decoy IL-1RII can after binding to IL-1 also recruit the IL-1 receptor accessory protein and thus inhibit by coreceptor competition. Further a soluble form of IL-1RII exists which is shed, a process in which matrix metalloproteases have been found to play a role, by various cells including monocytes, polymorphonuclear cells, B cells and fibroblasts.
