

Mouse anti-Human Interferon Alpha 1, clone 2-52 (Monoclonal)

Clone no. 2-52

MONOSAN

Product name	Mouse anti-Human Interferon Alpha 1, clone 2-52 (Monoclonal)
Host	Mouse
Applications	ELISA, IHC-fr, WB
Species reactivity	human
Conjugate	-
Immunogen	E. coli derived recombinant human IFN alpha1
Isotype	IgG1
Clonality	Monoclonal
Clone number	2-52
Size	100 ug
Concentration	100 ug/ml
Format	-
Storage buffer	PBS with 0.02% sodium azide
Storage until expiry date	2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Mouse anti-Human Interferon Alpha 1, clone 2-52 (Monoclonal)

Clone no. 2-52

MONOSAN

Additional info

The alpha interferons are involved in virus resistance in target cells for these viruses. They are known to block cell proliferation and to regulate MHC class I antigen expression. The IFN α family has over 20 genes and pseudogenes in two families (I and II), one with a mature length of 166aa and one of 172aa. Cells producing IFN α are lymphocytes, monocytes, macrophages and cell lines such as Namalwa and KGI. Bioassays for IFN α include cytopathic effect blocking, by viruses such as VSV, SFV and BMCV, on their target cells. A number of receptors for IFN α are now known and seem to be expressed on most cell types. 2-52 is specific for human IFN α 1 and does not cross react with human IFN α 2.
