

Mouse anti-Erythrocytes, clone SFL23.6 (Monoclonal)

Clone no. SFL23.6

MONOSAN

| | |
|---------------------------|---|
| Product name | Mouse anti-Erythrocytes, clone SFL23.6 (Monoclonal) |
| Host | Mouse |
| Applications | FC, IHC-fr, IF |
| Species reactivity | human |
| Conjugate | - |
| Immunogen | fetal hepatocytes |
| Isotype | IgG1 |
| Clonality | Monoclonal |
| Clone number | SFL23.6 |
| Size | 100 ug |
| Concentration | 100 ug/ml |
| Format | - |
| Storage buffer | PBS with 0.02% sodium azide |
| Storage until expiry date | 2-8°C |

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Mouse anti-Erythrocytes, clone SFL23.6 (Monoclonal)

Clone no. SFL23.6

MONOSAN

Additional info

SFL23.6 is directed against an erythroid cell surface antigen, which is not glycophorin A. It shows a well-defined reactivity with cells of the erythroid lineage at all stages of maturation in the peripheral blood, bone marrow, and fetal liver. Non-erythroid lineages are negative by flow cytometry. SFL23.6 is positive on erythroleukemias and can be used to distinguish bone marrow nucleated erythroid precursors from malignant cells in bone marrow specimens
