Product datasheet MON7063

Mouse anti-Polymyxin B, clone 45 (Monoclonal)

Clone no. 45 MONOSAN

Product name Mouse anti-Polymyxin B, clone 45 (Monoclonal)

**Host** Mouse

**Applications** ELISA,WB

Species reactivity human

Conjugate -

Immunogen Unknown or proprietery to MONOSAN and/or its suppliers

**Isotype** IgM

**Clonality** Monoclonal

Clone number 45

Size 1 ml

Concentration > 200 ug/ ml

Format -

Storage buffer PBS with 0.1% BSA and 0.02% sodium azide

Storage until expiry date 2-8°C

## FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Product datasheet MON7063

Mouse anti-Polymyxin B, clone 45 (Monoclonal)

Clone no. 45 MONOSAN

## Additional info

The monoclonal antibody 45 reacts with Polymyxin B. The antibody binds to free Polymyxin B as well as to Polymyxin B already bound to LPS. The peptide antibiotic Polymyxin B (PMB) binds to bacterial endotoxin (lipopolysaccharide, LPS). The interaction of PMB with LPS involves ionic forces between amino groups in PMB and negatively charged phosphate and carboxyl groups in the lipid A-Kdo region. PMB has relevance for endotoxin research in at least two ways: first, PMB reacts with LPS of many species regardless of varied serospecificity, and thus it can be used as a general probe for measuring or detecting LPS or lipid A. Second, binding of PMB to LPS may result in neutralization of the detrimental effects of LPS either in vitro or in vivo. Monoclonal antibody 45 enables the possibilities to study quantitatively the interaction of PMB and LPS.
