Product datasheet MON9006-1

Mouse anti-CD56, Neural Cell Adhesion Molecule, NCAM, clone 123C3 (Monoclonal), sample

Clone no. 123C3 MONOSAN

Product name Mouse anti-CD56, Neural Cell Adhesion Molecule, NCAM, clone 123C3

(Monoclonal), sample

Host Mouse

Applications IHC-P, IHC-fr (1:50), IF

Species reactivity human

Conjugate -

Immunogen Unknown or proprietery to MONOSAN and/or its suppliers

lsotype lgG1

Clonality Monoclonal

Clone number 123C3

Size 1 ml

Concentration 100 ug/ml

Format -

Storage buffer PBS with 0.1% BSA and 0.02% sodium azide

Storage until expiry date 2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Product datasheet MON9006-1

Mouse anti-CD56, Neural Cell Adhesion Molecule, NCAM, clone 123C3 (Monoclonal), sample Clone no. 123C3

MONOSAN

Additional info

The antibody recognizes a transmembrane glycoprotein of 140 and 180 kD which has been identified as NCAM (Neural Cell Adhesion Module). At the international Workshop on SCLC antibodies 123C3 has been categorized as cluster 1 antibody. All cells in small cell carcinomas and carcinoids of the lung are strongly positive for 123C3. A minority of cases of other major types of lung carcinoma are sometimes positive as well: however this positivity is generally weak and focal. Adenoid cystic carcinomas of bronchial glands are strongly positive. Neuroblastoma's and Wilms tumors are usually also staining strongly positive. In non-small lung cell carcinomas, 123C3 staining has been associated with more advanced stage and a decreased survival after surgery. Furthermore, this antibody can be used to support diagnosis of lymphoma or to detect residual disease for cases of CD56 positive T/NK -cell lymphoma in which the neoplastic lymphoid cells are small and show minimal atypia, especially in small biopsies.
