**Additional info**

M3II-9 reacts with an internal epitope of MRP3, a 190-200 kD transmembrane protein that is closely related to the multidrug resistance protein MRP1. M3II-9 was raised against a bacterial fusion protein of MRP3, containing amino acids 830-949 of the protein. M3II-9 does not cross-react with the human MDR1, MRP1, MRP2 or MRP5 gene products
