Mouse anti-Kappa Light Chain, clone EBS-huKappa (Monoclonal)

Clone no. EBS-huKappa

MONOSAN

Additional info

EBS-huKappa reacts with kappa light chain. In mammals, the two light chains in an antibody are always identical, with only one type of light chain, kappa or lambda. The ratio of kappa to lambda is 70:30. However, with the occurrence of multiple myeloma or other B-cell malignancies this ratio is disturbed.
