Product datasheet MON9875

Mouse anti-MHC II DR (alpha + beta chain), clone Bra30 (Monoclonal)

Clone no. Bra30 MONOSAN

Product name Mouse anti-MHC II DR (alpha + beta chain), clone Bra30 (Monoclonal)

Host Mouse

Applications FC, IHC-fr, IHC-P

Species reactivity human

Conjugate -

Immunogen REH (human ALL cell line)

Isotype IgG2a-K

Clonality Monoclonal

Clone number Bra30

Size 100 ug

Concentration 100 ug/ml

Format -

Storage buffer PBS with 0.02% sodium azide

Storage until expiry date 2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Product datasheet MON9875

Mouse anti-MHC II DR (alpha + beta chain), clone Bra30 (Monoclonal)

Clone no. Bra30 MONOSAN

Additional info

MHC class II molecules are encoded by polymorphic MHC genes and consist of a non-covalent complex of an α and β chain. Helper T lymphocytes bind antigenic peptides presented by MHC class II molecules. MHC class II molecules bind 13-18 amino acid antigenic peptides. Accumulating in endosomal/lysosomal compartments and on the surface of B cells, HLA-DM and -DO molecules regulate binding of exogenous peptides to class II molecules (HLA-DR) by sustaining a conformation that favors peptide exchange. The differential structural properties of MHC class I and class II molecules account for their respective roles in activating different populations of T lymphocytes.
